LETTER OF RECOMMENDATION

Warren E. Barry, Senior Designer
W.E.B. Designs
4409 NW 186 Street
Newberry, Florida 32669

We had the pleasure of working with Mr. Barry during the Spring of 2004. We presented a rudimentary picture and floor plan of the home we wanted to build. Mr. Barry spent an inordinate amount of time with us during our first meeting in order to elicit our needs, desires and preferences to incorporate those aspects into the home to not only make it attractive but functional as well. Of course we had many questions and asked for changes as the process ensued. Mr. Barry was highly available to us and amenable to making the changes we required. He made suggestions to us regarding design and function that had never occurred to us but greatly improved the quality of the home.

Mr. Barry advised us specifically about his responsibilities as the architect, the process of designing the home and the cost of his services. He created a timeline in which he would work with us and with the builder. There were no surprises during the working relationship, he delivered the plans before the expected deadline and the cost was exactly what he had quoted us during the first meeting.

Throughout the process Mr. Barry was highly professional, diligent in his work and accommodating with our schedules, requests and questions. We feel that through his knowledge, skill and vision he has created a remarkable home for us that we will truly enjoy. We highly recommend Mr. Barry without reservation.
