To Whom It May Concern:

Warren's plans are great, he has good ideas, and he brings valuable information to the table. It makes my job as the contractor much easier when working with someone like Warren who dots all the I's and crosses all the T's. My team has commented to me on more than one occasion that Warren is one of the most knowledgeable guys they have worked with. We appreciate the time, effort, energy, and knowledge that Warren puts into his work and it reflects in his plans. In addition, Warren has demonstrated that he looks after his customer's best interest while maintaining a functional, attractive, buildable, and code compliant design. Warren is an excellent architect and I recommend him to anyone looking to build a home or commercial building.

All the best,

Steven Matthews
